Polyachenko **Yury**

Intern for EPFL E3 summer program

Krasnogo Mayaka Street 13A, b. 6, Moscow, Russia, 117570

+7(903)531-34-25 | polyachenko.yua@phystech.edu | github: polyachenkoya | skype: polyachenkoya

Education

Moscow Institute of Physics and Technology (State University) (MIPT) *Moscow, Russia*

B.S. in Applied physics and Mathematics, specialized in Computational Physics *Sep. 2017 - Present*

- **Specialization:** Basics of computational physics of condensed matter, Molecular dynamics, Practice of HPC, Machine learning in physics of condensed matter
- **Mathematics:** Real analysis and Calculus, Differential geometry, Harmonic analysis, Complex Analysis, Analytic geometry, Linear algebra, Differential Equations, Computational Mathematics.
- **Physics:** General Physics (Mechanics, Thermodynamics and Molecular Physics, Electricity and Magnetism, Physical Optics), Theoretical Mechanics, Field Theory, Quantum Mechanics, Mathematical Physics.
- **Computer Science:** C/C++, Introduction to UNIX-based systems and multithreading, Introduction to parallel computations via MPI and CUDA.
- **GPA 4.01/4.3, top 3% of the course.**

Experience

Joint Institute for High Temperatures of the Russian Academy of Sciences (JIHT RAS),
Laboratory of non-ideal plasma theory *Moscow, Russia*

Laboratory Assistant *Sep. 2018 - Present*

- Investigated behaviour of the L-J system near the boiling points via space-time correlators. Delivered a report at the MIPT conference. 2019. Academic advisor - Norman G.E.
- Studied self-diffusion in Lennard-Jones systems using classical MD implemented in LAMMPS. Delivered a report on the obtained results at the MIPT conference. 2018. Academic advisors - Timofeev A.V. and Norman G.E.
- Created from scratch a MD simulation engine (C/C++, CUDA, OpenMP, Python, Matlab). 2018.

Moscow Institute of Physics and Technology (State University) (MIPT),
Department of Computer Science *Moscow, Russia*

Assistant Teacher *Sep. 2019 - Dec. 2019*

- Worked as a mentor and assistant teacher on the python CS course for freshmen.
- Helped to design new Python exercises for an updated python CS course.

Moscow Institute of Physics and Technology (State University) (MIPT),
Laboratory of Mechanical Systems and Processes Modeling *Moscow, Russia*

Intern *Aug. 2018 - Oct. 2018*

- Modelled elastic wave propagation using ray tracing (Matlab, C/C++, OpenMP).

Extracurricular Activity

Took Stanford «Machine Learning» course on Coursera

Got 100% score *Aug. 2019*

Summer School on Classical Molecular Dynamics for Material Science, Nanotechnology and Biophysics, SISSA *Italy*

Student *10-21 Jun. 2019*

- Had lectures and practice on basic MD simulation techniques and programming tools.
- Got a glimpse of several more advanced topics such as Dimension reduction, Enhanced sampling, Polymer and Protein dynamics.

Mathematical modeling internship at the Russian national educational center Sirius in the scientific-technological project program «Big Challenges» *Russia*

Intern *1-24 Jul. 2019*

- Helped senior-school students master Linux, bash, Python and LAMMPS
- Guided a group of senior school students in conducting a research dedicated to studying collective motion in Lennard-Jones systems.

Achievements

Aug. 2019	**Participant,** 16th Russian Symposium FOAMM. *Polyachenko Y. A., Fleita D. Iu., Pisarev V. V., Norman G. E. «Study of Lennard-Jones system near the boiling point via space-time correlators» // Works of the 16th Russian Symposium FOAMM. 2019. p. 10.*	*New Athos, Georgia*
28 Jan. 2019	**Awardee,** National Physics Olympiad for Undergraduates «I am a professional»	*Moscow, Russia*
27 Jan. 2019	**Awardee,** National Mathematics Olympiad for Undergraduates «I am a professional»	*Moscow, Russia*
25 Nov. 2018	**2nd place,** 61st National Scientific MIPT Conference, Specialization «Fundamental bases of multi-scale atomistic simulation and modeling» *Polyachenko Y.A., Timofeev A.V. Diffusion in the Lennard-Jones system. // Works of the 61st National Scientific MIPT Conference. Fundamental and applied physics. 2018. pp. 165-167.*	*Moscow, Russia*
Jun. 2018	**Top 10 of the course (∼ 1100 people),** Scientific project competition. MD simulation package was created and used to test and improve MKT equations.	*MIPT*
Apr. 2017	**29th place,** Russian National Physics Olympiad for high school students.	*Kazan, Russia*

Skills

Over 5000 lines	C/C++, Matlab, Python, Linux
Had some experience with	C/C++: OpenMP, POSIX threads, MPI, CUDA, OpenGL, VCL/Firemonkey Python: scipy, numpy, matplotlib Other: Wolfram Mathematica, LaTeX, Origin
Languages	Russian, English
